

COLOR PLANNER 2.0

WITH GENIUS DIGITAL IMAGE MASKING SYSTEM[®]

Color Planner 2.0 is the most sophisticated color visualization software.

With the new Genius Digital Image Masking System[®] you can use your own photos without any image handling tools.

Benefits

- User can use own picture without any image handling tools like "magic wand" or "lasso".
- You can offer your paint and coating products direct to real surface when software uses intelligent digital image recognizing system.
- Customer can pay masking service via invoice, credit cards and scandinavian Internet banks.
- No more wrong color shade to wrong surfaces. Only necessary color maps for target area available.
- Automatic updating system for color maps and product catalogue.
- Support to all languages, also Chinese and Cyrillic languages (remains 19 languages).
- Brand support for different brands and market areas. Software reads the operating system which is the market area.
- Full video streaming available. You can show how to use your products.
- Very easy to use.
- Your logo in customer's desktop after the installation.
- You can follow your Color Planner statistics information from colorplanner.com statistics system.
- Easy distribution for your collaboration firms for example house factories. They can use their own sample pictures with their logos and your colors and products.
